National Plan Review

SAFEbuilt

Tired of fluctuating project volumes that leave your building department with too much (or too little) work? SAFEbuilt combines the expertise of plan reviewers nationwide with local codes and community awareness to streamline workloads.

Keep residential and commercial projects moving

Whether you need one plan review or to tackle a large backlog, our team works with yours on an as-needed basis to help work through and avoid plan review backlog.

How NPR differs from a full-time hire

Unlike hiring a full-time plan reviewer, NPR gives you:

- The ability to complete concurrent reviews
- A national network of plan reviewers
- Access to specialized trades
- A real-time look at plan review status

Don't worry — your plan reviewer will always be deeply immersed in your local codes

Many of our plan reviewers are certified in multiple areas, including:

Commercial & Residential Review
Education Facilities Plan Review
Fire Plan Review
MEP Plan Review
Post-Disaster Plan Review
Site/Civil Plan Review
Seismic Plan Review
Structural Plan Review
On-Site Sewage Facility Review

Get technology that helps your community

NPR uses SAFEbuilt's proprietary technology to automate plan submissions, reviews, and certifications. This real-time look at current projects makes it easy to scale reviewers with fluctuating demand.

Don't let another plan get lost in the shuffle

See how NPR can help you save time and budget and improve customer satisfaction.
